

No Sew Blanket Instructions

Have FUN!!

All you need is 1 yard of no-pill fleece (it won't ravel or pill up), a ruler, a marking pen or pencil, a pair of sharp scissors, and about an hour of free time.

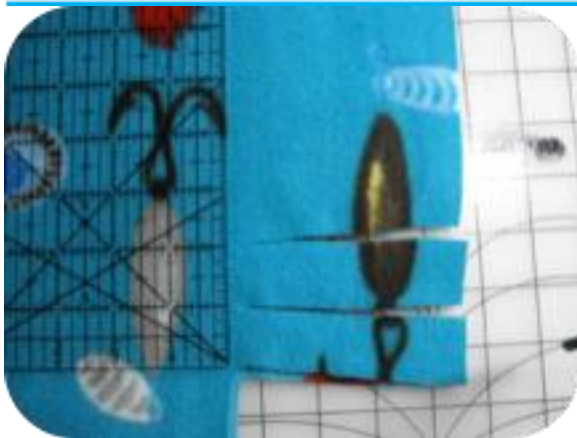

1st- Remove the selvages off of the two sides.

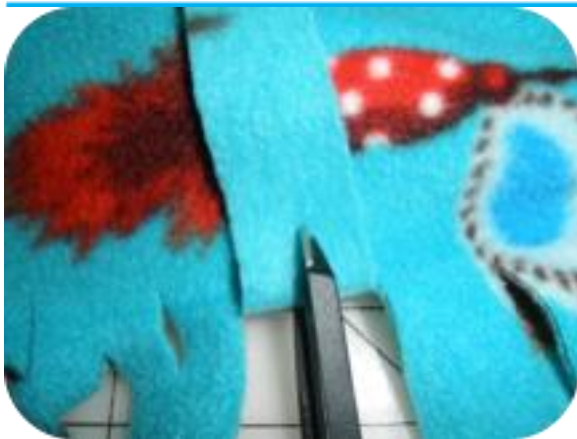

If you look carefully, you will see that the selvage is compressed, stiff, and often perforated. We don't want this in the finished product.

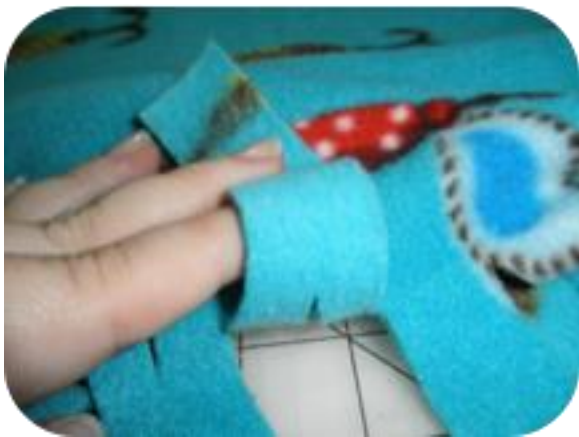

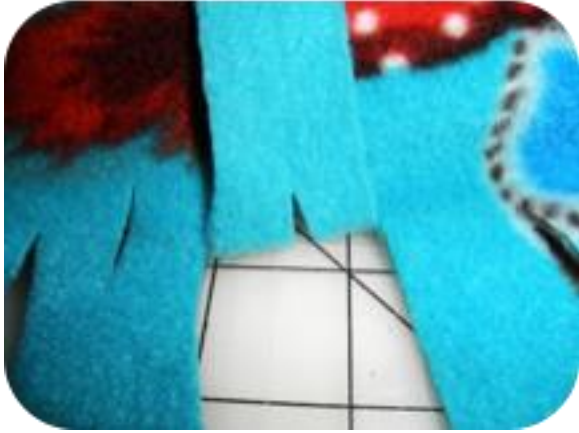

Then, cut a 2 1/2" X 2 1/2" square out of each of the four corners.

Next - Using a ruler for a guide, cut 1 to 1 1/2" inch strips (doesn't have to be exact) up to the line you just made.

Fold each strip all the way up to where it meets the body of the blanket, and snip a small section in the middle of each strip creating a hole.

Finally, grab the strip and push it back through the hole.

Tug lightly. Continue this all the way around the blanket. (It looks really nice if you only pull every other one [strip] through the hole from the top-side, and the remaining strips pull through the hole from the bottom-side.)

That's all there is to it! Now, you have a finished blanket.
